What are the benefits for you?

Easy maintenance that saves you time and money
We handle the servicing, so you can focus on what matters

Support when you need it, anytime
24/7, 365 days a year, we're here for you

Expert care for peak performance
Our highly trained engineers ensure top-tier service

Genuine parts for lasting reliability
Keep your equipment running smoothly with authentic components

What products can we service?

X-ray processors

X-ray generators

Ultrasound scanners

Endoscopy

Lasers

Image management systems

3D imaging - CT & MRI

Do you have equipment from another provider? We've got you covered!
At IMV, we proudly service equipment **even if it wasn't purchased from us!**

IMV Academy

We offer a wide range of vet and vet nurse CPD courses to suit every learning style; including theory based, diplomat-led attendance courses, solely practical days and highly interactive eLearning. Our offerings span beginner to advanced levels and include everything from comprehensive, in-depth programmes to bitesize, region-specific modules.

Looking for something more tailored? We also provide bespoke in-practice training options to help you sharpen your diagnostic imaging skills. Courses are available across the UK, Ireland and online - making it easy to learn, wherever you are.

The range of courses we offer:

- Ultrasound
- Echocardiography
- Radiography
- Endoscopy
- Bespoke in-practice training

"I found the online CPD easy to access and use, the flow was intuitive and the content was really well broken down to make it easy to understand. I've already used what I've learned in practice!"

Jodie Harper,
Registered Veterinary Nurse,
Wallace Vets, Broughty Ferry

84% Before taking the Introduction to Abdominal Ultrasound eLearning Course, 55% of participants felt unsure or lacked confidence in their skills. After completing the course, 84% felt confident and capable.

4.8/5 Throughout 2024, The IMV imaging Academy received an overall rating of **4.8/5** across all course formats.

1,174 Did you know, over the past two years, we have provided training to **1,174 people through in-person courses?**

A study into the impact of our eLearning demonstrated that, within three months of completing our course, participating practices saw a 65% increase in the number of full abdominal scans performed.

Our flexible online modules let you learn anytime, anywhere, at your own pace;
seamlessly fitting into your schedule for a hassle-free, engaging experience

| About us

Our Story

At IMV imaging, we have been leading the way in veterinary imaging for over 40 years. Innovation is at the heart of everything we do, and we are proud to have designed the world's first wearable ultrasound scanner through our original company, BCF Technology.

Founded in Scotland, we have grown into a global business, proudly supporting veterinary professionals dedicated to improving animal care. We are leaders in veterinary imaging, specialising in Ultrasound, X-ray, Endoscopy, PACS, CT, and MRI for small animal and equine practices.

Our Core Values

Our Mission

To create a world where veterinary professionals are empowered to provide the highest standard of care, driven by their passion for animals.

Our Vision

To build a global imaging business centered around providing real solutions for our clients and their patients. Moving forward with purpose through technology, education and partnership.
