

Guide to Safely Using Denaturing Kits

- 1** Before removing the lid, shake to loosen the granules
- 2** Insert medication to be destroyed
- 3** Carefully fill with water to the indicator line, and securely replace the lid
- 4** Shake thoroughly for 30 seconds
- 5** Store in a locked CD cabinet until the contents fully denature.
This can take up to 24 hours
- 6** Dispose of via secure incineration
