

Surface Disinfectant Cleaner

- ⚠ Use biocides safely. Always read the label and product information before use. For industrial use only.
- ⚠ Wear protective clothing as described in Section 8 of the safety data sheet.
- ⚠ 'Keep out of reach of animals and children.

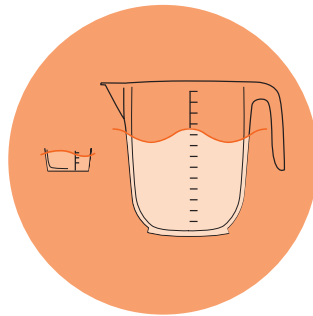

- ⚠ Use suitable respiratory protection if ventilation is inadequate.

1

Dilute the concentrate

Use G9 approved pump dispensers* or mixing stations to dispense concentrate solution into bucket or G9 approved foaming trigger sprays at required solution.

2

Clean heavily soiled surfaces

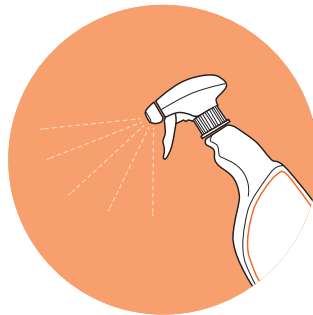

Remove any visible soil, faeces and debris. Work from the clean area to the dirty area and dispose of accordingly.

3

Apply diluted G9 Surface Disinfectant to surface

Cover entire surface until thoroughly wet, complete surface coverage is paramount to ensure disinfection can be achieved on the first application. For small surfaces apply using G9 approved foaming trigger sprays.

4

Leave disinfectant in contact for required time

Wipe the surface and ensure the surface remains wet for the required contact time. Be sure to follow the contact time guidelines for the required pathogens.

5

Wipe surface and allow to dry

Use a cloth/wipe for consult tables, kennels and other small surfaces, for larger surfaces such as floors allow them to air dry or rinse if required.

New to G9?

If you have changed over to G9 surface disinfectant from your existing product we recommend to replace any existing used accessories with new fresh G9 approved accessories such as pump dispensers, mixing stations and trigger sprays.

Dilution Efficiency/Effectiveness

Always follow stated dilution ratio's to achieve microbial efficacy and cost economy. More product added and increased dilution does not equal improved efficacy.

UK Danger

Concentrate Solution:
Hazard statements (CLP) :
H314 - Causes severe skin burns and eye damage. H400 - Very toxic to aquatic life.
